HYDROGEN GENSET

GEH2 electro-hydrogen generators offer power delivery without CO₂ emissions or other pollutants. Its record-breaking energy density produces instant power from 100kVA to 1MVA in an optimized volume.

GEH2 is equipped with the latest generation of fuel cells from our partner Toyota, giving it exceptional durability and reliability.

It is the most compact and efficient electro-hydrogen generator in the world relative to the power delivered.

ZERO EMISSION

ZERO POLLUTION

ZERO NOISE

PARTNERS:

SOLAR POWER

Solar Power Solutions have a wide range of applications and are extremely versatile as they can be integrated with any of our battery power solutions. Our solar panels can be placed on top of any temporary structure, optimized to capture rays from the sun.

Moreover, our systems are designed according to load and size demands and can be custom tailored to the exact project requirements, saving on unnecessary transportation for bulky containers.

SEAMLESS INTEGRATION

BIO

BIO-FUEL

BOOSTplus Bio-fuel is a natural fuel combustion enhancer that reduces fuel consumption and emissions in all types of liquid fossil fuels. Using a special formulation of 100% natural vegetable esters, BOOSTplus

BOOSTplus Bio-fuel allows more efficient atomization of fuel, delivering more power and fewer emissions from the same amount of fuel. BOOSTplus doesn't just cut CO2 and particulate emissions in the fuel you consume, it also eliminates your production of CO2, CO, NO, NO2, NOX & HC on the fuel you save.

Lab & field tested over millions of km's and 1000's of hours BOOSTplus is guaranteed to deliver. It is the only non-chemical and sustainable solution that addresses fossil fuel challenges today.

BATTERY PACKAGE RENTAL

Our **Battery Package Rental Solutions** are very practical and convenient as they can be used simultaneously for multiple applications. FLOW can sync any battery system with Solar Solutions, Hydrogen Cells or Bio-Ready Gen-Packs.

Batteries are a fast and clean energy source, and with the set up taking minutes, they can also be a great backup solution in an emergency.

Our Batteries come in multiple sizes to suit your needs from **10KVA** up to **500KVA** and can be applied to multiple frequencies (Hz).
